Hyatt House+Hyatt Place // Cook County Hospital, Chicago, IL

HMI MULTI-UNIT

Project Case Study

Putting the *Hospital* into Hospitality

Objectives

Built in 1914 and vacant for nearly 20 years, the historic Cook County Hospital underwent a $90 million transformation into a 210-room dual-branded Hyatt House/Hyatt Place.

Challenges

Adaptive-reuse projects pose unique scheduling challenges. HMI's scale, quick lead times, and dedicated Contract Division provide reliable support, seamless coordination, and competitive pricing.

Solutions

To meet the project's design and performance needs, HMI Glass delivered its Heavy Euro Series semi-frameless sliding doors—crafted with 3/8" glass for a sleek, high-end look and reliable functionality in demanding hospitality settings.
