

Products Supplied:

- Frameless Series Shower Enclosures

Project Case Study

A Place Built for Letting the Day Go.

 *Objectives*

 *Challenges*

 *Solutions*

HMI Multi-Unit provided custom shower enclosures for Margaritaville Hotel Kansas City, supporting the brand's signature blend of laid-back comfort and resort-driven guest experience across all guestrooms. With a large-key, fast-moving hospitality project delivering island-inspired design at scale, the primary challenge was maintaining consistency, schedule alignment, and quality across repetitive room types while coordinating with a complex construction environment. Through early collaboration with the project team, detailed field verification by our partners, and streamlined glass & hardware fabrication, HMI ensured smooth execution, dependable delivery, and durable, clean-lined enclosures that aligned seamlessly with the relaxed yet refined Margaritaville aesthetic.
