### Project Case Study

## Luxury Shower Glass Designed for Elevated Living in The Gulch.

#### Objectives

#### Challenges

#### Solutions

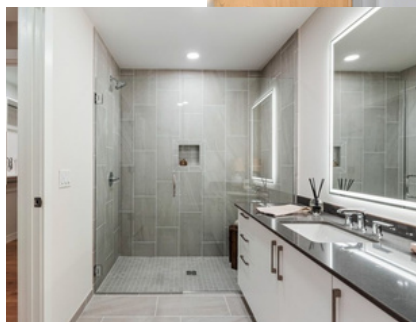

HMI Multi-Unit supplied fully domestic frameless shower enclosures for The Pullman at Gulch Union, supporting HKS's vision for a refined luxury condominium experience within one of Nashville's most ambitious mixed-use developments. The scope included a wide range of custom heavy glass configurations featuring premium chrome HMI hardware, including notched tub deck panels and other intricate fabrication requirements across multiple floorplans. With elevated finish standards, complex layouts, and an aggressive construction schedule, domestic manufacturing was critical to maintaining precise fabrication, tighter quality control, and dependable field coordination throughout the project lifecycle. The result was a clean, modern glass package aligned with the tower's upscale architectural aesthetic and luxury residential design intent.

### Project Details

- Brand: *The Pullman*
- Property Type: *New Construction, Luxury Condos*
- Units: *306 units*
- Height: *29-stories*
- Product Supplied: *HMI Frameless Series Shower Doors*
- Completion Date: *2024*

### Project Team

- Developer: *Endeavor Real Estate*
- Architect: *HKS*
- General Contractor: *Turner Construction*

### Key Benefits

- Domestic Manufacturing
- Unparalleled Service
- Fast Leadtimes
