Project Case Study

Showers Built Tough—Like the Terps
Barry P. Gossett Basketball Performance Center Locker Rooms

 *Objectives*

Deliver durable, contract-grade shower enclosures with satin frosted glass and matte black hardware for the Terps' locker rooms, combining performance and modern design for daily use by elite athletes.

 *Challenges*

The locker rooms required shower enclosures that could withstand high daily use, heavy moisture, and repeated cleaning, while maintaining privacy, style, and long-term durability.

 *Solutions*

HMI Glass provided satin frosted, heavy-duty shower enclosures with matte black hardware and C.10 glass protection for added durability and easy cleaning, delivering a contract-grade solution that met the design intent while performing reliably in high-traffic locker rooms.
